FEDERAL COMMUNICATIONS COMMISSION
Washington, D.C. 205554

RECEIVED

FEB - 7 1995

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF SECRETARY

In the Matter of

Amendment of Parts 21 and 74 of the
Commission's Rules With Regard to
Filing Procedures in the Multipoint
Distribution Service and in the
Instructional Television Fixed Service

and

Implementation of Section 309(j) of
the Communications Act - Competitive
Bidding

MM Docket No. 94-131

DOCKET FILE COPY ORIGINAL

PP Docket No. 93-253

REPLY COMMENTS OF UNITED STATES WIRELESS CABLE, INC.

United States Wireless Cable, Inc. ("USWC"), through counsel and pursuant to the Commission's Notice of Proposed Rulemaking (the "NPRM"), hereby respectfully submits its Reply Comments, and in support hereof respectfully shows as follows:

I. Open A Filing Window For Actual Operators To Complete Their Channel Complements.

USWC supports the position expressed by American Telecasting, Inc. that the qualification requirement for the initial filing window should be that the applicant has authorizations and/or leases for at least 9 MDS and/or ITFS channels in the market. This requirement was agreed upon as a consensus figure by representatives of the principal operating wireless cable companies at a meeting at the Wireless Cable

Association on Tuesday, January 31, 1995. The requirement is designed to ensure that the filing window is confined to applicants who already control more than two four channel groups in the area.

Unlike PCS and IVDS, the Commission is not writing on a clean slate in this area. Attached hereto as Exhibits 1 and 2, respectively are the first and last pages of the FCC's MDS and ITFS inventories. The MDS inventory (Exh. 1) is 268 pages in length and the ITFS inventory is 166 pages long. Although the last page lists the total number of application records, these inventories contain records of many licensed stations, not just applications. In fact, every entry with a call sign represents an authorized station. USWC respectfully urges the Commission to spend a few minutes reviewing these inventories before adopting auction rules for new MDS applications.

II. Streamline The Processing Of MDS Modifications.

USWC anticipates that some parties may consider the processing of MDS modification applications to be beyond the scope of this proceeding. The Commission must "think outside the box" in order effectively to accomplish its objectives for wireless cable. See Speech by Commissioner Chong to the FCBA, January 19, 1995.

A. The Need To Co-locate By Modification

MDS and ITFS channels cannot be assembled into a wireless cable system unless they are co-located at one site and

with the same operating parameters. Modification applications are essential to co-locate MDS and ITFS channel groups licensed to different parties at different times at different sites.

Delays in processing modification applications critically undercut the ability of wireless cable operators to assemble a sufficient number of channels at one location in order to compete with wired cable and DBS.

Yet delays are built into the FCC's current rules for MDS modifications. The MDS rules actually make change in the location of an MDS station one of the most difficult changes to accomplish, contrary to the critical need to co-locate the stations in this line-of-site service.

Rule changes are necessary to expedite processing of MDS modification applications. These rule changes should be considered and adopted as part of this proceeding.

The 120 day notice period should be shortened to 30 days and mail service eliminated. Lottery losers should be excluded unless and until they become the tentative selectee.

B. Automatic Forfeiture Rules Are Counter-productive

MDS permittees and lessees are being subjected to undue hardship under automatic forfeiture rules contrary to the long-standing policies of the Mass Media Bureau. Automatic forfeiture should be eliminated and MMD processing policies should be applied to MDS.

USWC has objected to the warehousing of unbuilt or dark MDS stations that are not part of an operating wireless cable system. However, where the permittee has entered into a lease and is seeking to modify the station to co-locate the station with the wireless system, the Commission should apply its rules on extension applications and construction certifications in a reasonable manner so as not to cause inadvertent forfeitures of permits during the modification process.

In the ITFS Service, where a permittee completes construction during the pendency of an extension application, the construction certification is accepted and the extension application is dismissed as moot. In the MDS Service, permittees who complete construction while an extension application is pending have been charged with unauthorized construction and been subject to fine and forfeiture. This is inappropriate.

The Video Services Division should be permitted to apply its case precedent to the MDS construction certifications, extensions and modifications now under its jurisdiction. The VSD policies are consistent with court precedent, while the MDS automatic forfeiture policy is not. E.g., MG-TV Broadcasting Co. v. FCC, 408 F.2d 1257, 1261 (D.C. Cir. 1968); Mass Communicators, Inc. v. FCC, 266 F.2d 681, 684 (D.C. Cir. 1959), cert. denied, 361 U.S. 828, 80 S.Ct. 76 (1959); United Detroit Theatres Corp. v. FCC, 178 F.2d 700, 702 (D.C. Cir. 1949).

The Commission's goal is to encourage the construction of MDS stations, not to discourage it. A permittee who has a pending modification or extension application on file should not be subjected to fine and/or forfeiture for inadvertently missing a construction date or for not constructing at a non-co-located site.

One of the most difficult aspects of assembling wireless cable channels into a system is the co-location and facilities modification process. This process is difficult enough without imposing letter perfect, strict constructionist rules regarding extensions and construction certifications.

The warehousing of channels is not occurring in these cases. These are cases where the permittee is attempting to co-locate its station under a lease agreement with the operator in the market so that all of the channels can be assembled into one system.

Warehousing typically occurs when stations are constructed or certified as constructed at disparate sites and then left dark. Such situations can be remedied by a complaint or petition by the operator in the market or by adoption of a finder's preference for operators. It should be left to the operator in the market to report warehousing to the Commission. Where the operator is not pursuing such a complaint or petition, the Commission should not on its own motion forfeit MDS permits with pending extension or modification applications. Doing so

only makes it more difficult for the operator to assemble channels and co-locate them at one site.

III. Conclusion

Wireless cable operators are facing difficult competition from DBS as well as wired cable. A critical window exists for the Commission to help them assemble the channels they need to compete. During the freeze, DBS has launched. The Commission should lift the freeze quickly with rules for new MDS applications and modification applications (especially co-location applications) that focus upon existing systems first.

Respectfully submitted,

UNITED STATES WIRELESS CABLE, INC.

EXHIBIT 1

MDS Inventory

THIS DOCUMENT IS USED INTERNALLY TO FACILITATE STAFF PROCESSING OF APPLICATIONS. INTERESTED PARTIES ARE URGED TO CONSULT THE ACTUAL COMMISSION FILINGS TO DETERMINE THE CORRECT STATUS OF ANY GIVEN APPLICATION. THE DATA SHOWN HEREIN IS AN UNOFFICIAL COMPILATION OF DATA AND AS SUCH ITS ACCURACY IS NOT GUARANTEED. THE OFFICIAL DATA CONTAINED IN THE APPLICATIONS THEMSELVES WILL HAVE PRIORITY OVER ANY INFORMATION HEREIN. THIS LISTING IS MADE AVAILABLE TO THE PUBLIC FOR WHATEVER USE IT MAY BE, WITH THE ABOVE DISCLAIMER.

APPLICANT CODES

FIELD 13	FIELD 14
APPLICATION TYPES	APPLICATION PURPOSE
P - CONDITIONAL LICENSE	D - DEVELOPMENTAL
L - CERTIFIED LICENSE	L - LOCATION CHANGE
MP - MOD. OF CONDITIONAL LICENSE	A - ANTENNA CHANGE
ML - MOD. OF CERTIFIED LICENSE	E - EXTEND TIME ON C.P.
R - RENEWAL OF CERTIFIED LICENSE	I - INCREASE ANTENNA HEIGHT
AP - ASSIGNMENT OF COND. LIC.	- DECREASE ANTENNA HEIGHT
AL - ASSIGNMENT OF CERT. LIC.	T - TRANSMITTER CHANGE
TC - TRANSFER OF CONTROL	X - CHANGE POLARIZATION
** FOLLOWING ARE FOR *****	B - ADD FREQUENCY
** APPLICATIONS BEFORE *****	C - CORRECT COORDINATES
** 11/9/1987 *****	N - APPLIC. FOR NEW STATION

D4 - DWOP AT REQUEST OF COUNSEL	D5 - DWOP PURSUANT TO SEC. 21.20(D)	D6 - Non-surviving settlement group applicant	

When multichannel applicants are proposing or authorized to use less than the full complement of four channels for the group they are using, the applicable channels are indicated by a number in parentheses after the channel code. These numbers will range from 1 to 14 and will signify the channel usage as follows:

(1) - channel 4 only	(2) - channel 3 only	(3) - channels 3 & 4
(4) - channel 2 only	(5) - channels 2 & 4	(6) - channels 2 & 3
(7) - channels 2 & 3 & 4	(8) - channel 1 only	(9) - channels 1 & 4
(10) - channels 1 & 3	(11) - channels 1 & 3 & 4	(12) - channels 1 & 2
(13) - channels 1 & 2 & 4	(14) - channels 1 & 2 & 3
